Rex,

Thanks for your email.. [REDACTED] Wish I commanded that type of crowd control ability in my classroom!

Dinner sounds great -- I'll let you know my plans as they get finalized. I'm attending a panel meeting of the Agricultural Health Study that is being conducted by NCI and NIEHS. I got invited to serve on an extramural panel to listen to their progress and future plans -- should be interesting.

[REDACTED]

Give my regards to the family and will be in touch before March 1.

Kind regards,
Matt
